

**King County would like to
invite you to save the date for the...**

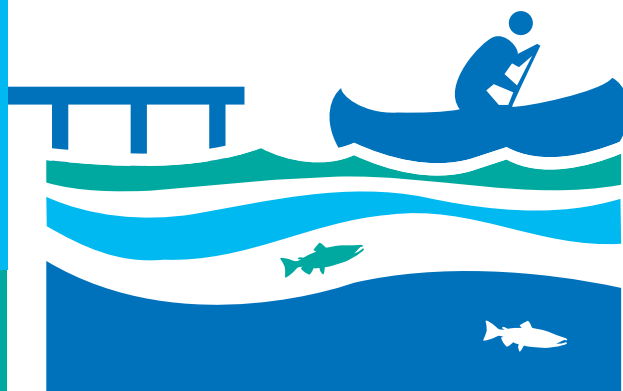

2014 Lake Stewardship Volunteer Monitoring Training Workshop!

**April 26, 2014 9:30 a.m.-noon
Preston Community Center, Preston**

King County

Department of
Natural Resources and Parks
Water and Land Resources Division

We are excited about the expansion of our program from 12 to 34 small lakes across the county and want to meet new volunteers, greet current volunteers, and welcome back former volunteers to the water quality monitoring program.

WE PLAN TO:

- Review where we've been and where we're going;
- Introduce our new staff and some KC folks you might not know;
- Discuss sampling procedures, pick-up routes, and fieldsheets;
- Hand out equipment and talk about how to use it (and the first set of bottles);
- Pass along some information on the KC environmental lab, aquatic plant, and toxic algae blooms in King County;
- Answer as many questions as we can and make notes on those we can't!

Please RSVP to Sally Abella and include how many people will be in your group at sally.abella@kingcounty.gov or call **206-477-4605**.

If you cannot come, we will work with you to deliver equipment and answer your questions before the first sample date of May 4, 2014.
